DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-272126 to Yamagata.

As to claim 1, Yamagata discloses a method of automatic determination of a color scanning mode for a scanner (abstract), comprising:

determining whether a black-and white (b/w)scanning mode is appropriate according to an image data previewed by the scanner (fig. 8, S2, 0051, note that monochrome character is scanned by b/w mode);

performing a b/w scan when the b/w scanning mode is appropriate (fig. 8 S14, 0051);

determining whether a gray scale scanning mode is appropriate when the b/w scanning mode Is not the appropriate scanning mode (fig. 8 S3 and S4 0052 and 0062, note that monochrome processing mode is a gray scale mode, e.g., photograph or map modes are inherent to be gray scale scanning modes);

performing a gray scale scan when gray scale scanning mode is the appropriate scanning mode (fig. 8 S7, S9, 0055-0056);

Application/Control Number: 09/898,610

Art Unit: 2623

performing a color scan when the gray scanning mode Is not the appropriate scanning mode (fig. 8, S8 and S11, 0054 and 0056).

Allowable Subject Matter

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Clam 4 depend from claim 3 are, therefore objected.
